WEEK ASSIGNMENT

Short Notes →

- (i) Hominins → Human beings developed slowly from people called hominins. They were very similar to human beings and lived on the Earth for thousands of years.
- (ii) Homo habilis → A person with abilities. They were the first type of hominins who lived on the Earth.
- (iii) Homo Erectus → A person who walks upright. They were the second hominins who adapted themselves to the environment so well that they lived on the Earth for million years.
- (iv) Homo sapiens → A person who can think. With the arrival of Homo sapiens the speed of advancement increased greatly.

Fill in the blanks:-

1. Human beings first appeared in Africa.
2. It is believed that Homo erectus was the first to use fire.
3. Homo sapiens means a person who can think.
4. The second type of hominins are Homo Erectus.
5. Three type of hominins are — Homo habilis, Homo Erectus and Homo Sapiens.
